# Glory Alphonsus
Fullstack Developer

I am a skilled fullstack developer with experience in building complex web applications from scratch using various programming languages and frameworks such as JavaScript (MERN Stack), Python (Django), and PHP (Laravel). I have a proven track record of quickly learning and adapting to new technologies, which enables me to deliver top-notch results.

I've completed several successful projects working with teams and working solo. I take pride in my communication and collaboration skills, and I'm passionate about problem-solving and innovation.

## Experience

**2022 - Present**
Freelancer
### Backend Developer

As a freelance backend developer, I have gained a wealth of knowledge and experience that makes me a valuable addition to any team. I have a track record of quickly learning and mastering new programming languages, and I pay close attention to detail and quality assurance. I enjoy working in both team and self-directed settings, and I have collaborated with others on various projects.

Key responsibilities:

- Created REST APIs using Node.js and Laravel, providing robust and efficient solutions to client needs.
- Developed a chatroom with Node.js and Socket.io, improving the user experience of web applications.
- Demonstrated the ability to quickly learn and master new programming languages and technologies to deliver high-quality results.
- Collaborated with other developers and stakeholders on multiple projects, ensuring timely delivery of high-quality code that meets client requirements.
- Ensured all code is well-documented and maintainable, making it easier for future developers to understand and modify.

Overall, my experience as a freelancer has equipped me with the skills and expertise to thrive in any backend developer position. I look forward to bringing my passion for innovation and problem-solving to your team.

## Certifications

Tech1m BOOTCAMP                              2022
### Backend Engineering Student

Technical Skills and Experience:

- Proficient in PHP, particularly Laravel framework
- Created a REST API with Laravel and implemented passport authentication for a job posting project during a bootcamp
- Demonstrated ability to work independently and deliver high-quality results within tight deadlines
- Strong attention to detail and a commitment to writing clean, maintainable code
- Continuously learning and expanding technical skills to stay up-to-date with the latest technologies and trends

Ingressive For Good x Zuri                   2022
### Full-Stack Developer student

Cohort 1 & 2

Technical Skills and Experience:

- Completed a bootcamp in full-stack development with Python using Django framework
- Completed a bootcamp in full-stack development with JavaScript using Node.js
- Collaborated with a team on various occasions to build a code library using SQL and a form builder using MongoDB
- Demonstrated ability to work effectively in a team environment and deliver high-quality results
